RE: Safe Drinking Water and Toxic Enforcement Act (California Proposition 65)

To Whom it May Concern:

B&B Manufacturing, Inc. takes the safety and health of our employees, our customers, and our customer's customers seriously. We strive each day to be known for our integrity in how we conduct business and maintain regulatory compliance.

Proposition 65, officially named the Safe Drinking Water and Toxic Enforcement Act, prohibits retailers and manufacturers from knowingly and intentionally exposing California consumers to chemicals known to the State of California to cause cancer or developmental or reproductive harm without first providing a "clear and reasonable warning." (Cal. Health & Safety Code § 25249.6.)

There are over 900 ingredients and chemicals on the California Office of Environmental Health Hazard Assessment (OEHHA) list of carcinogen or reproductive toxicants. Many of the elements listed under Proposition 65 are common everyday chemicals and/or additives found in products such as timing pulleys, sheaves, belts, food, coffee, almonds, jewelry, lamps, ceramic tableware, lead crystal glasses, electric cords, automobiles, beauty products, furniture, etc.

The Proposition 65 Warning Label is required by law on all products that may contain any of these ingredients and materials listed in the OEHHA that are sold to consumers in California. There is always a chance that the hundreds of chemicals listed in Proposition 65 could potentially be on or in our products or packing materials, so we are required to include the Proposition 65 warnings on our products sold to California under this law. As further precaution **we label all our products for Proposition 65 regulatory compliance regardless of where they are sold** unless specifically requested to transfer the labeling responsibility to our customer as a distributor or reseller.

We make the following statement of warning for **all our products** to assure compliance to California Proposition 65:

WARNING: This letter serves as notice that products manufactured by B&B Manufacturing, Inc. contains chemicals known to the State of California to cause cancer, and birth defects or other reproductive harm. For more information go to <https://www.p65warnings.ca.gov/>.

Should you have any questions about our labeling or want to inquire about transfer of label responsibility, please contact me directly.

Thank you,

Kalvin J. Morrison
